Reference Modules on ScienceDirect

The best research starts with Elsevier Reference Modules.

Librarians and researchers agree: for too long, the most important and difficult part of the research process has been separating trustworthy, current information from everything else. Until now.

Welcome to Elsevier Reference Modules on ScienceDirect.

**Trustworthy**
Elsevier Reference Modules provide you with access to thousands of peer-reviewed articles from Elsevier’s Major Reference Works, selected and organized by an expert Editorial Board.

**Discoverable**
Articles are organized into intuitive subject hierarchies designed by the Editorial Board. They are easy to navigate, helping you quickly find essential information.

**Current**
The Editorial Board continuously reviews each module, ensuring it covers the most significant recent developments in the field. Time stamps mark the date of the most recent review or update.

**Hosted on ScienceDirect**
Elsevier Reference Modules help you take advantage of all of the related information available to you by making it easy to find and use books and journals throughout ScienceDirect.

**Academic, Government, and Professional Users can:**
- Build foundational, interdisciplinary knowledge
- Keep current with new developments in their field
- Explore new and related topics

**Librarians and Information Specialists can:**
- Increase their service to patrons
- Guide patrons toward superior research
- Maximize the discoverability, and usage, of content their institution offers access to through ScienceDirect

- 7,000+ contributors
- 11,000 images at launch

“Biomedical science is an interwoven web of different disciplinary threads that connect different fields and require that we have access to information in disciplines that are far outside our area of expertise.”

*Micahel Caplan*
Editor-in-Chief for Reference Module in Biomedical Sciences
Yale University School of Medicine, USA

“The module covers the complete spectrum of biology and biomedical aspects integrated in a very well organized fashion. As scientists we rely on correctness and something being up-to-date and so the module is important because it provides this level of knowledge”

*Ralph Bradshaw*
Subject Editor for Reference Module in Biomedical Sciences
University of California, San Francisco, USA

**With continuously updated articles from the following Elsevier Major Reference Works:**
